Subject: RE: Convention Education

Good afternoon Chapter Executives –

NECA Education has asked us to contact you directly in hopes of recruiting and securing NECA members willing to present at educational sessions at the 2020 NECA Convention in Chicago. Attendee responses overwhelmingly show NECA members enjoy courses led by NECA members the most, and the goal is to grow the number of courses we can offer.

If you have any members willing to teach the following subject, please send me their name and contact information. Members are able to build their own presentation / team to address the topic as they feel best to highlight what they are doing as a company. Convention education courses typically last 50 minutes with AV needs provided.

Topics:

- Technology
- Prefabrication
- Tool Control
- Use of Drones
- Piece Work
- Improving Communications
- Retainage
- Succession Planning
- Change Orders
- Hiring Talent
- Developing relations as a Subcontractor / with Subcontractors
- Any additional topic a member is willing to present on.

Please let me know if there are any questions. Thank you in advance for your help making this convention's education experience stronger for attendees.

Have a great weekend,

Ian Andrews
